

Curved Shower Rods

Brey-Krause's heavy-duty curved Shower Rods are offset by 6-7/32 inches and greatly increase the space available behind the shower curtain. Their solid construction using heavy-gauge materials and welded flanges protect against vandals and excessive wear. Our curved shower rods a similar design and materials to those used in our grab bars. They are **specified to fit 60" openings** with custom lengths available by special request. Call the factory for more details.

The bars are fabricated from either 1" or 1 1/4" diameter 18 gauge (.049 wall) stainless steel tubing, and available in satin stainless (SS), bright stainless (BS), and several powder-coated finishes.

Note: The shower rod and flanges are sold as one unit.

The Brey-Krause curved shower rod provides unique mounting flanges that **adjust to fit wall openings between 58-5/8" to 61-1/2" width** when your opening is not exactly 60" (custom rod lengths are available upon request)

Rod Sizes:

S-1034-SS

Part number specifies 1" diameter, 18 gauge curved shower rod with 6-7/32" offset and pair of concealed mounting flanges as shown (hardware not included).

S-1044-SS

Part number specifies 1-1/4" diameter, 18 gauge curved shower rod with 6-7/32" offset and pair of concealed mounting flanges as shown (hardware not included).
